Art Unit: 1794

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 19, 2008 has been entered.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 3, 4, 9-13 and 19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cain et al ('938) in view of Bodnar. Applicant is referred to paragraph no. 7, Paper No.20080510. Further, Cain et al ('938) also discloses that the fat blend is partially covered or encapsulated by a sugar matrix and dispersed within a salt egg and flour matrix (col. 5, lines46-65) as set forth on page 6 of the December 7, 2007 Office action.

4. Claim 26 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cain et al ('938) in view of Bodnar as applied to the claims above, and further in view of Cain et al ('143) as set forth in paragraph no. 12, Paper No. 20071204.

5. Applicant's arguments filed August 19, 2008 have been fully considered but they are not persuasive. Applicant's contention, regarding use of the claimed particulates in a creamer, whitener or non-dairy alternative, is without merit since the use thereof is

Art Unit: 1794

entitled to no patentable weight in applicant's composition claims. Further, finding the optimum amount of each component in applicant's composition would require nothing more than routine experimentation by one reasonably skilled in this art.

Applicant's comment, that the claimed fat will need to meet certain requirements in terms of melting behavior which are different from the melting behavior of the fats in the primary reference, is based upon mere conclusion unsupported by any factual evidence of record.

Applicant's contentions regarding Cain et al ('143) on page 9 of the remarks are not convincing. The particulate form and particle size are not deemed to be critical in the absence of unexpected results. Additionally, Cain et al ('938) meets applicant's particulate form limitation. The addition of herbs, spices or vegetable powder are not required by claim 20, which claims 0% of each of these. Applicant's limitation regarding encapsulation of the fat blend is disclosed by Cain et al ('938) as set forth in paragraph no. 3 above. Lastly, the fact that Cain et al ('143) only mentions mayonnaise type sauces and not "savory" sauces is a not a detracting feature thereof. Not only are "savory" sauces not claimed by applicant, but mayonnaise type sauces are considered to be savory.

6. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued

Art Unit: 1794

examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
